Introduction

Purpose

This update bulletin provides a brief description of the new customer-facing features and changes to existing features introduced in Roundtable TSMS 12.1. Other internal changes or bug fixes that have been made to improve organization and/or performance may not be described in this document.

Audience

This document is intended for current Roundtable TSMS users upgrading from 12.0 to 12.1 or Roundtable TSMS users who want to learn more about the new and changed features available in Roundtable TSMS 12.1.

Platform Availability and Compatibility

- The Roundtable TSMS 12.1 standard GUI client is available for OpenEdge 11.0 and higher on supported Windows platforms.
- The Roundtable TSMS 12.1 plug-in for OpenEdge is available for Progress Developer Studio for OpenEdge 11.0 and higher on supported Windows platforms.
- The Roundtable TSMS 12.1 server is available for all OpenEdge 11.0 and higher on supported server platforms.

IMPORTANT: Roundtable TSMS software earlier than 12.0 is not compatible with Roundtable TSMS 12.1 repository databases. It is recommended that you maintain a separate repository if you must continue development that requires the use of older Roundtable TSMS releases.

For complete compatibility details of all Roundtable TSMS and Progress OpenEdge releases, please see the Roundtable TSMS Compatibility Matrix available at www.roundtable-tsms.com.

New and Enhanced Features

Roundtable TSMS 12.1 rolls-up all 12.0 service packs and includes the new features, enhancements, and bug fixes outlined below.

General Enhancements

- Add ability to perform a Workspace contents search.
- Add ability to view “blame” output for repository data.
- Add hierarchical option for Tabletop treeview.
- Allow multiple managers for a Task.
- Allow Administrator users to manage user accounts.
- Add more client-side event hooks.¹
- Add new user reports.
- Add Jira integration with Tasks (beta).²

GUI Client Enhancements

Usability

- Add preference to allow users to view Tabletop tree in a hierarchical presentation.
- Add preference to automatically close visual diff dialog on selection.
- Add context menu allowing user to view repository contents in a “blame” format.
- Add ability to select multiple Task managers.
- Add Workspace Contents Search window (beta).
- Add preference to enable Jira integration (beta).

Reports

- Add “User Privileges Report” to show privileges for all users for the current Workspace.
- Add “Users Report” to show all defined Roundtable users.

Integration

- Add publishing of client event hooks for AppServer configurations.

Plug-in Client Enhancements

Usability

- Add “File” search tab to Roundtable search allowing users to search Roundtable Workspace contents.
- Add “Default Search” preference allowing users to set their default Roundtable search tab.
- Add context menu allowing user to view repository contents in a “blame” format.
- Enable color-coding when viewing Backup contents.
- Enable access to User maintenance for Administrator users.
- Add preference to enable Jira integration (beta).

¹ See `rtb_events_cl.p`

² See `rtb/jira/readme_jira.txt`

- Add Jira Issue search integration to Task property page (beta).
- Add Jira Transition search integration to Task property page (beta).

Server Enhancements

Usability

- Disallow Release creation if no changes since latest Release.
- Modify Rename Workspace process to avoid lock-table overflow errors.
- Deploy Jira integration components as source (beta).

Bug Fixes

- Fix sizing error on check-in dialog when using large font.
- Fix issue with users updating their own passwords.
- Fix logical schema registry issue.
- Fix “No Dependencies” selection process during selective compile.
- Fix Versions in Product Module report flagging non-orphans as orphans.
- Fix Import Orphan flag.
- Fix multiple HTML Object compile and duplicate r-code issue.
- Fix selective compile not compiling all dependent Objects.
