## Introduction

### Purpose

This update bulletin provides a brief description of the new customer-facing features and changes to existing features introduced in Roundtable TSMS 12.5. Other internal changes or bug fixes that have been made to improve organization and/or performance may not be described in this document.

### Audience

This document is intended for current Roundtable TSMS users upgrading from 12.4 to 12.5 or Roundtable TSMS users who want to learn more about the new and changed features available in Roundtable TSMS 12.5.

### Platform Availability and Compatibility

- The Roundtable TSMS 12.5 standard GUI client is available for OpenEdge 11.7 and higher on supported Windows platforms.
- The Roundtable TSMS 12.5 plug-in for OpenEdge is available for Progress Developer Studio for OpenEdge 11.7 and higher on supported Windows platforms.
- The Roundtable TSMS 12.4 server is available for all OpenEdge 11.5 and higher on supported server platforms.

### **Important**

Roundtable TSMS software earlier than 12.5 is not compatible with Roundtable TSMS 12.5 repository databases. It is recommended that you maintain a separate repository if you must continue development that requires the use of older Roundtable TSMS releases.

For complete compatibility details of all Roundtable TSMS and Progress OpenEdge releases, please see the Roundtable TSMS Compatibility Matrix available at [www.roundtable-software.com](http://www.roundtable-software.com).

## New and Enhanced Features

Roundtable TSMS 12.5 rolls-up all 12.4 service packs and includes the new features, enhancements, and bug fixes outlined below.

### General Enhancements

The following new features were added for both the GUI and plug-in clients:

- Add ability to store Jira credentials.
- Add ability to associate tasks with Jira issue.
- Add ability to associate task object with Jira issue.
- Add preference to control when object backups are removed.

### GUI Client Changes

The following changes were made to support the general enhancements or are unique enhancements and bug fixes for the GUI client:

#### Usability

- Add 'Delete Backups' option to **System Preferences** dialog.
- Add 'Credentials' button in Jira section to **User Preferences** dialog.
- Add 'Jira Credentials' dialog.
- Add Object Group browse column in **Find Object** dialog.
- Add search option to **Workspace Import** task filter page.
- Add search buttons where need on maintenance windows.
- Enable search direction arrows on browsers.
- Automatically store all browse columns widths.
- Improve default sorting in tabletop **Backups** view.
- Improve tabletop tree scrollbar spacing.

#### Bug Fixes

- Ensure that system record has a GUID value when created via **Setup and Update** procedure.
- Ensure that status bar properly updates when deleting a workspace.

### Plug-in Client Changes

The following changes were made to support the general enhancements or are unique enhancements and bug fixes for the plug-in client:

#### Usability

- Add 'Delete Backups' option to **Repository Preferences**.
- Add 'Set Jira Credentials' content menu option for repository node.
- Add 'Jira Credentials' dialog.
- Add 'Show Immediate Children Only in Physical Schema View' option to **User Preferences**.
- Modifications to lessen PROPATH changes to avoid issues with the OE tooling.

- Improve cursor wait-state visualization during project creation.

### Server Changes

The following changes were made to support the general enhancements or are unique enhancements and bug fixes for the server:

### Usability

- Modify repository handler to consider 'Delete Backups' preference for check-in and check-out actions.
- Add class to support Jira custom field mapping.
- Add class to support Jira credentials storage.
- Add methods to Issue handler to store task and task objects.
- Add procedure to associate task with Jira issue.
- Add procedure to associate task object with Jira issue.
- Add Sonar properties builder to facilitate integration with CABL/SonarQube.

### Bug Fixes

- Ensure that shelf item contents can be updated when running via AppServer configuration.

### NOTE

Please see *rtb/jira/readme\_jira.txt* in the Roundtable installation directory for details on configuring Jira integration.
